Portable Python Lock & Chain

Following the success of our Python, we have introduced a portable version - strong enough to pass Thatcham's strict attack tests but light enough to be portable for a rider wanting to protect their bike when they're away from home.

It's 1.2 meters in length with 9.5mm case hardened links and coupled with the superb 10mm case hardened alloy steel lock. The portable python has all the outstanding features of the 1.5m Python, including a nylon-weave outer sleeve and Plasticoat cuffs to protect your wheels and paintwork.

Suitable for all types of general purpose applications.

Features

- > Case and core hardened 9.5mm chain
- > 1.2 metres length
- > Easy snap lock mechanism
- > Plasticoat cuffs
- > Thatcham approved

Specification

- > Exceeds the 5 minute attack test time
- > 1.2 metres long
- > Easy feed zinc plated links
- > 9.5mm case and core hardened chain
- > Durable, highly visible protective sleeve
- > Lock supplied with 3 keys
- > Replacement sleeves available
- > Anti-pick/anti-drill fine gauge lock assembly
- > Self-locating padlock shackle, 10mm thick and fully shielded
- > Plasticoat cuffs on each end link
- > Highly visible lock
